

Project Synopsis: Student Mental Health Support System

PES1UG22CS294

PES1UG22CS306

The **Student Mental Health Support System** is a comprehensive platform designed to enhance student well-being at colleges and universities by providing easy access to mental health resources, counseling sessions, and personalized wellness tips. The system enables students to book appointments, access educational content, and receive customized notifications based on their needs, all while ensuring data privacy and confidentiality. Administrators and counselors can efficiently manage resources, monitor overall mental health trends, and provide timely support. Built with a secure database and user-friendly interface, the system aims to create a supportive environment that fosters mental health awareness and care across the campus community.
